

WHITEPAPER

INTRODUCTION

With no contract owner (OWNERSHIP RENOUNCED), ATUM is a decentralized token built on Binance smart chain with 5-second block speeds that have evolved into an ecosystem. Our ecosystem ATUM, which is interconnected with the Metaverse, includes a variety of dApps. In the ATUM ecosystem, you may take advantage of the entire Metaverse experience in addition to playing games or using simple dApps such as Swap and Market. Our goal is to transform the current web3. By fusing the metaverse with blockchain, ATUM provides a wholly decentralized environment that gives players and creators direct ownership of their Tokens, NFT or in-game products in a totally open and impenetrable ecosystem. Users of ATUM enjoy a totally safe and unrestricted immersive experience.

PLAY-UTILITY-GOVERNANCE

Governance tokens are tokens that developers create to allow token holders to help shape the future of a protocol. Governance token holders can influence decisions concerning the project such as proposing or deciding on new feature proposals and even changing the governance system itself.

Utility tokens are designed to be used for a specific purpose, for example in a DApp or in a game. They offer holders a number of benefits, often access to products and services.

"1% of each transaction is redistributed to holders"

OUR BACKGROUND

Tudor is a powerful name, he started the creation of our community from a unique perspective.

"Without the unified people who give it meaning, a community-run token has no meaning."

With zero, we got our start. Our project's goal is to create something from nothing. I can still clearly recall the first day when a wonderful vision of a wonderful man actually materialized.

WHY Binance?

When you compare different blockchains, we see that Binance is a bridge between everything and many other opportunities. It is a secure and very well-developed place. Our priority is to ensure that this project is free to change and evolve without anything else impacting it, and Binance Smart Chain is the way to achieve this goal.

Atum token is focused on becoming the most popular with the highest volume of transactions on the side of the Binance Blockchain.

ATUM ECOSYSTEM/PROJECTS

ATUM Market

People using our platform may access a wide range of NFT-based games to play and earn NFT or regular NFT from our stock through ATUMMarket, a dApp store. In the ATUM Market, players may purchase and sell their gaming equipment as well as sell their winning NFTs.

ATUMSwap

ATUMSwap is a decentralized exchange that runs on our platform as an exchange entity. Users can purchase ATUM Tokens immediately and HOLD or swap back to another cryptocurrency.

Atum AR

We will search the actual world with our mobile device for summoning spots in the Atum AR Metaverse. We may sell this NFT on ATUMMarket or exchange it for another NFT with the same Rarity but a different design.

ATUM Plots

Players in the ATUM Plots have their own unique NFT Land that they may upgrade with ATUM Tokens. Upgrades, for example, might include anything from buildings to trees..

TOKENOMICS OF ATUM

Total Supply:

800.000.000 \$ATUM

REWARDS IN YOUR WALLET

\$ATUM is a hyper-deflationary token that will grow more expensive over time. By just keeping Atum token in their wallet, all ATUM holders will earn extra ATUM, which will be instantly distributed to their wallet. As atum token holders automatically get a 1% fee from every transaction made on the Atum Ecosystem, the number of Atum token in your wallet will rise. The fees earned by each transaction produce more atum tokens for the community.

2% of each transaction added to liquidity pool

1% of each transaction is redistributed to holders

OUR TEAM / COMMUNITY

As Atum finds strength and greatness in its community, the Atum team will always be here to observe and support this wonderful project. These are [@Tudor](#) [@Alina](#).

In other words, Atum's contract will not have an owner who can manipulate or do anything else in its favor.

Thank you ♥

NAME: ATUM

DECIMALS: 18

CREATOR: 0x4ef5c035b88865aeba650effd8a262088a638757

CONCLUSION

Beginning with a sliver of an idea, the Atum community developed.

What is possible in the absence of both funding and a direct owner?

For the decentralized community, this marks the start of a new era. I want to thank you once more for reading all the way through and let you know that without you, nothing would have been possible. Now is the time for us to address it.

ATUM WHITEPAPER

The information has been updated as of the publication date because this is a live document. Please be aware that this is not intended to be financial advice, trading advice, investment advice, or any other type of advice.

The ATUM team advises that before making an investment decision, you conduct the necessary research on your own. The team is not liable for any losses if you purchase Atum token because you acknowledge that you are not also purchasing security for the investment you agreed to make. Before making any kind of purchase, make sure you are abiding by local laws.
